

Get Your Fracs Straight

A Strong Foundation Makes All the Difference

The best frac and mud tanks are built on a heavy-gauge floor welded to square tubing that is sealed to lock out moisture and debris. While some manufacturers use I-beam and C-channel, they can become brittle over time and are prone to corrosion. PCI's frac and mud tanks are built to endure years of abuse without rusting or buckling under stress.

Sealed beam floors—a design you can count on, day-in, day-out.

OUR SERVICE ROCKS

Pinnacle Materials knows the only way to meet firm deadlines is to deliver flexible solutions. Working primarily in North America's oil and gas fields but with service to a wide range of industries, Pinnacle offers something the competition can't match—comprehensive service paired with genuine respect for the customer.

The right product at the right time makes all the difference to your bottom line. That's the Pinnacle Materials brand of satisfaction. And it's available in the following areas:

- Anadarko Basin
- Bakken Shale
- DJ Basin
- Eagle Ford Shale
- Fayetteville Shale
- Haynesville Shale
- Permian Basin
- Powder River Basin
- South Marcellus Shale
- Tuscaloosa Marine Shale
- Utica Shale

When you're ready for rock, we're ready to roll.

Our QC Requirements Are Extreme—
Extremely Effective

PCI Manufacturing's stringent quality-control process requires more than 45 individual checkpoints before every tank rolls out the door. Some people call it obsessive. We call it a tireless commitment to customer satisfaction.

Top Three Quality Check Points Per Stage of Construction

Weld Out:

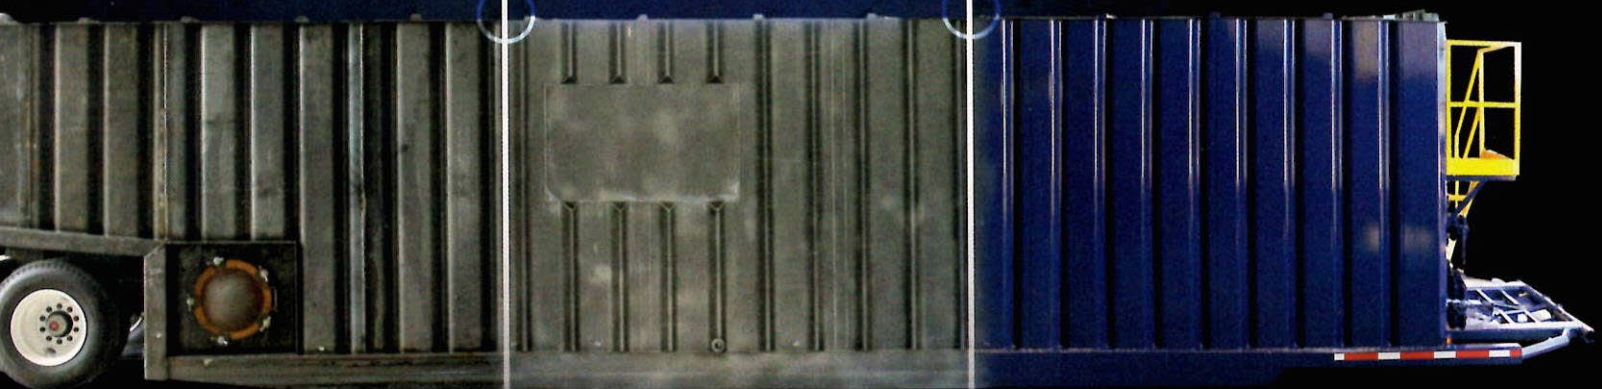

- 100% weld inspection
- Component welds double-checked
- Full water testing, final repairs before finishing

Blast:

- Steel shot blast with 2.5 mil anchor profile
- Any flaws repaired
- Tank completely clean

Paint / Coating:

- Consistent interior exterior finishing
- Strictly mil / spark tested
- final assembly & inspection of light, brake systems

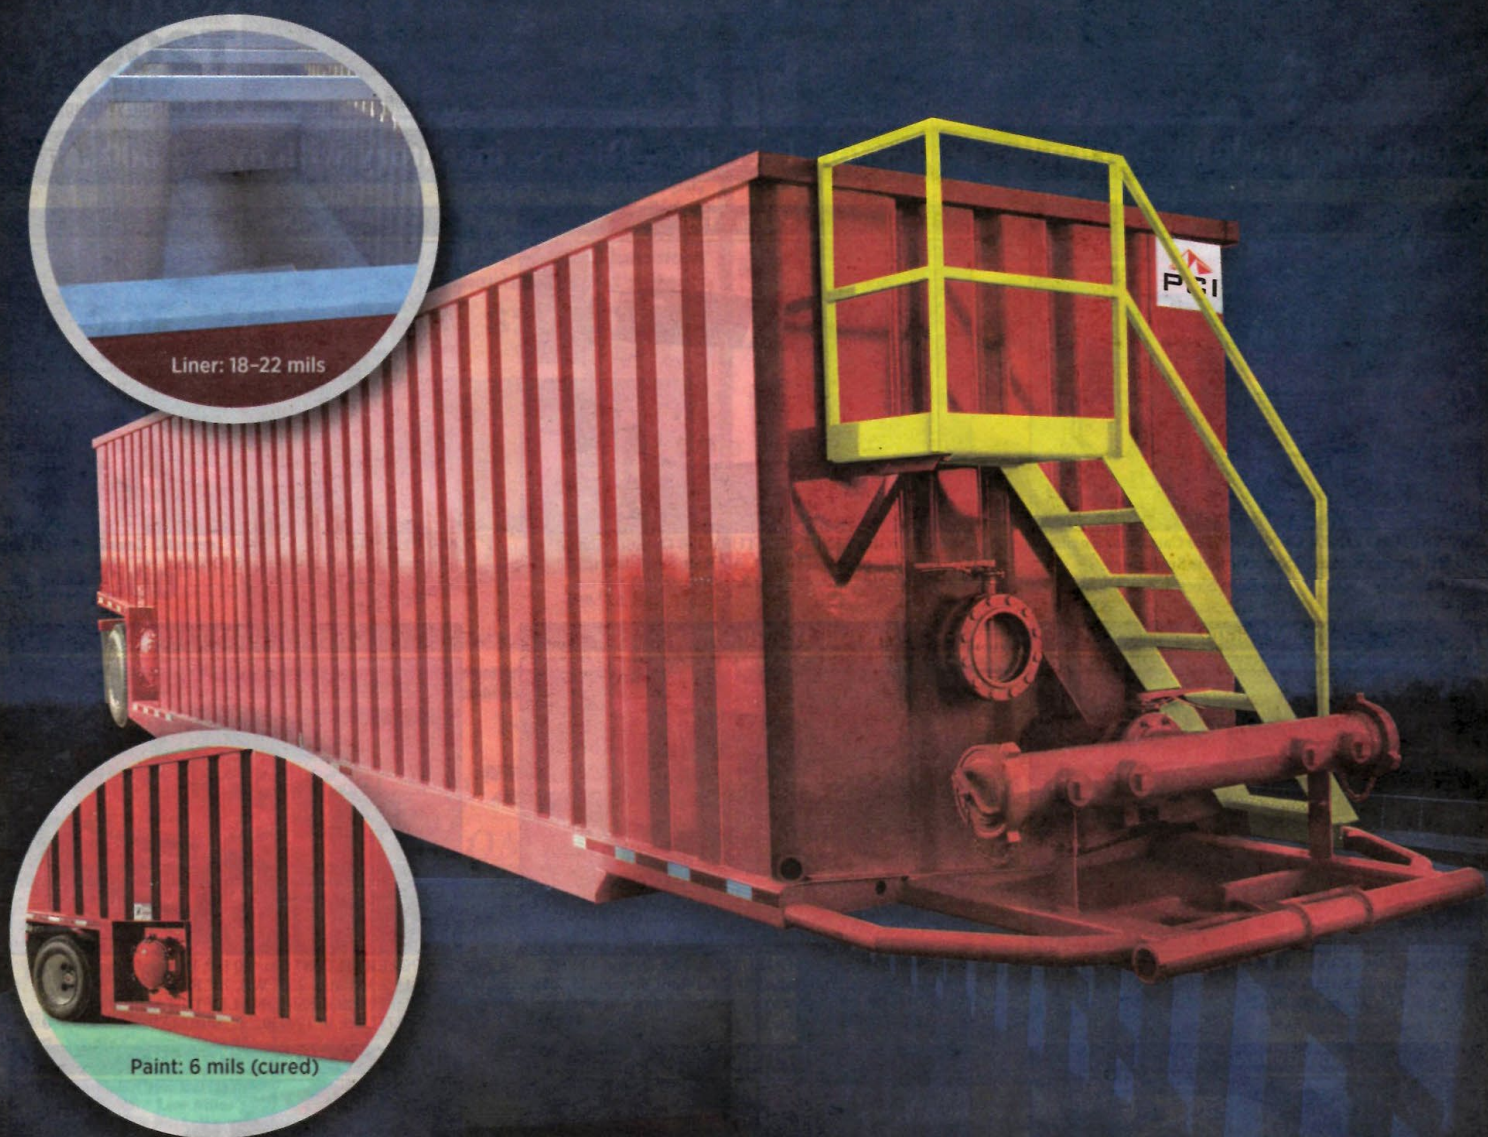

**We keep our word,
so you can keep yours.**

Paint shouldn't cover mistakes;
it should protect your investment

At **PCI Manufacturing**, quality paints and coatings ensure maximum performance from our tanks. That's why we cover the outside with high-solids Strathmore paint and the inside with a Carbolite epoxy coating, while the undercarriage is

protected with a rugged layer of Pure Asphalt undercoating.

Our rigorous spark testing ensures you've got a tank that performs longer than anything else on the market.

We keep our word, so you can keep yours.
